

## Media Alert

### ***Testronic Continues to Support Customers Needing QC Testing During Covid-19***

As we all try to deal with this unprecedented situation, we're reminded of how thankful we are for our own health and the health and safety of our families and friends that have not contracted the virus. For those who are impacted, we hope for the best care and treatment possible.

Right now, there are so many things to deal with simultaneously between work and home, children and the elderly, and although we are all also working to maintain some business continuity and to minimize the damage done to our industry during the regional lockdowns, it is people that comes first. We hope that you, our friends, colleagues, clients, and partners, are all healthy and safe and we are here to support you in whatever ways we can.

At Testronic, we are fortunate to have offices in both Chile and Poland in addition to our Burbank office. For now, only our Burbank office is on mandated lockdown due to the California Governor's "safe at home" directive. While obeying this order, we have setup options for work-at-home for various QC workflows when content security permits. However, our Poland and Chile offices are still open and running. If we can help with QC by taking projects in one of our other offices, please contact us. We're already finding that many of our Los Angeles-based and London-based clients are eager to utilize our Poland office during this time as our Warsaw team has been working alongside our Burbank team, to the same standards, for many years.

Please let us know how we can help. And although this situation is stressful, please try to enjoy this time at home as much as possible, with family.
